

Purpose: The Board supports the provision of free, open and non-filtered internet access for library patrons. Internet access is an everyday necessity for learning, social engagement, and civic participation.

1. The Board supports the Canadian Federation of Library Association's "Access to Information and Communication Technology" position statement (2016) which asserts that Canadians have a right to universal, equitable and affordable access to robust information and communication technology networks; access to information literacy; open access to information; freedom of expression; and privacy.
2. The Library will provide equipment and space to ensure that patrons have adequate internet access to meet basic needs.
3. The Library will maintain administrative policies and procedures to effectively manage public internet access.
4. As per Board policy LM.2, "Confidentiality of User Records," no record of internet use by any individual will be provided to law enforcement or other public agencies without a court order requiring such provision.
